

EFFICIENT IMPLEMENTATION WITH EXPERT CARE FROM ASG TECHNOLOGIES

ASG-ValidDate Quick Start Implementation Service

UNDERSTANDING ASG-VALIDDATE

z/OS Alternate Date Testing

ASG-ValidDate provides for testing the effect of a specified alternative execution date in the z/OS environment. It allows the user to test the effect of a different date on the execution of a program to assist the developer to prove proper execution of the program on a specific date. This helps to prevent errors when the program is run at a future date.

IMPLEMENTING ASG-VALIDDATE QUICKLY

By taking advantage of the extensive knowledge and experience of ASG Technologies' product experts and implementation service team, you can implement our solutions quickly and smoothly. ASG subject matter experts have been involved with a wide variety of Customer environments and make it their mission to ensure our Customers gain a clear understanding of the product during implementation. In this way, your team becomes self-sufficient and gains maximum benefits from all aspects of the solution.

The ASG-ValidDate Quick Start Implementation Service is based on the use of ASG-Express-ICM to install and customize the product. ASG-Express-ICM is a feature available at no extra charge to ASG-ValidDate Customers. It provides a comprehensive and robust set of tools to assist both novices and experts to quickly and easily install, configure and maintain the ASG-ValidDate product in the site's environment.
