

ASG Technologies is a leading provider of information management, IT systems management, and digital automation software. Our portfolio includes an array of trusted and evolving mainframe solutions designed to help customers increase business agility by empowering them to activate strategies that make sense for their unique environments.

MAINFRAME PERFORMANCE & CAPACITY MANAGEMENT

[Learn More](#)

ASG-TMON Portfolio

The ASG-TMON® and ASG-TMON® PA product suites provide comprehensive performance management and capacity monitoring of business-critical mainframe and distributed systems. Business value stream views of technology, including alerts and metrics, improve the understanding of system health and resource provisioning, helping infrastructure and operations teams reduce mean time to repair (MTTR) and accelerate the delivery of value.

Compare to: BMC AMI Ops, CA SYSVIEW, IBM OMEGAMON, IntelliMagic Vision for z/OS

MULTI-PLATFORM WORKLOAD AUTOMATION

[Learn More](#)

ASG-Zena and ASG-Zeke

ASG-Zena and ASG-Zeke workload automation solutions provide modern capabilities for scheduling and automating repetitive IT workloads at scale across the hybrid enterprise. This enables customers to increase efficiency and productivity by performing more work at scale across all major enterprise computing platforms, from mainframe to cloud.

Compare to: BMC Control-M, CA Automic, CA 7, CA Workload Automation ESP, Tidal Workload Automation, Stonebranch Universal Automation Center, Redwood RunMyJobs

DEVOPS ENABLED JCL MANAGEMENT

[Learn More](#)

ASG-PRO/JCL & ASG-JOB/SCAN

ASG-PRO/JCL and ASG-JOB/SCAN provide modern capabilities to ensure customers can efficiently and effectively operate and manage error free, standardized and optimized JCL assets in a DevOps environment. They can manage JCL in leading integrated development interfaces (IDE) through an Eclipse plugin for Compuware Topaz and IBM IDz and automate core JCL functions using a RESTful web service API for continuous integration/continuous delivery (CI/CD) solutions like Jenkins.

Compare to: BMC Control-M JCL Verify, CA JCLCHECK, SEA JCLplus+, ISC JCL Checker

DEVOPS VALUE STREAM MANAGEMENT

[Learn More](#)

ASG-Enterprise Orchestrator

ASG-Enterprise Orchestrator is a powerful DevOps value stream management platform that automates, orchestrates and executes critical business processes across your enterprise—mainframe to cloud—from a single solution that improves cross-team collaboration.

Compare to: BMC Control-M, CA Automic, Plutora, Tasktop, CloudBees

MAINFRAME CODE AND SOFTWARE CHANGE MANAGEMENT

ASG-Existing Systems Workbench and ASG-SmartTeam

[Learn More](#)

ASG-Existing Systems Workbench (ESW) and ASG-SmartTeam products are suites of tools that enable developers to better understand mainframe COBOL code and ensure its quality during maintenance activities such as changes to design, specifications and code; testing; and documentation.

Compare to: Compuware, Broadcom/CA, IBM

ASG-Life Cycle Manager

[Learn More](#)

ASG-Life Cycle Manager™ Total Solution provides an intuitive, menu-driven environment for controlling changes to multiple configurations of software or documents throughout the software development life cycle, ensuring only authorized changes are incorporated into sanctioned baselines, releases, or production environments.

Compare to: CA Endeavor, Micro Focus ChangeMan ZMF, Compuware ISPW

AUTOMATED DATA DISCOVERY AND LINEAGE

ASG Data Intelligence™

[Learn More](#)

ASG Data Intelligence™ (ASG DI) provides end-to-end visibility and traceability of all data elements from the source to all points of consumption, including how data moves and is transformed across all your infrastructure and systems. This insight allows the business to understand all upstream and downstream data dependencies along with the business logic applied, which is critical to ensure the successful modernization and/or migration of mainframe applications with minimal risks.

Compare to: Informatica, IBM Information Governance Catalog, CA Data Content Discovery

CONTENT SERVICES PLATFORM

ASG Mobius Content Services

[Learn More](#)

ASG Mobius Content Services is a modular, open and REST API-led content services platform enabling firms to capture, manage, govern and distribute large volumes of information at scale. By harnessing innovative automation technologies, Mobius streamlines processes allowing organizations and their employees to focus on high-value tasks, providing exceptional customer service and governing sensitive information across the enterprise.

Compare to: CA View, CA Deliver, IBM CMOD, Laserfiche, Systemware, SYSCOM
